**COPPER MOUNTAIN COMMENCES FEASIBILITY STUDY WITH HATCH ENGINEERING**

**Vancouver, B.C., December 13, 2007** – **Copper Mountain Mining Corporation** (“CMMC” or the “Company”) is pleased to announce that Hatch Ltd. (“Hatch”) has been engaged to complete a Feasibility Study as recommended by the recently released Preliminary Assessment Report on the Company’s 100% owned Copper Mountain project located near Princeton, British Columbia. The Feasibility Report will form a key component in making a production decision on the Copper Mountain Project in the first half of 2008. The Company’s goal is to have the Copper Mountain project in production by the end of 2010.

The Feasibility Study will be based on the design criteria in the Preliminary Assessment Report which involves processing 35,000 tonnes per day of mill feed and producing a copper concentrate containing approximately 100 million pounds copper per year plus gold and silver. Giroux Consultants Limited have been contracted to update the 43-101 interim resource report filed on SEDAR and included drill data up to July 20, 2007. The updated resource report will include drill data up to December 20, 2007. Drilling at the site has been continuous since July and the company plans to continue an aggressive drilling program into 2008 to maximize the property’s potential and test some of the deeper potential identified in the recently released Titan 24 results (see news release dated December 4, 2007).

Mr. O’Rourke, Chief Executive Officer of Copper Mountain stated: “We are pleased to have Hatch involved with this project early and proceeding with the Feasibility Study is another major step forward for the Company in the reactivation of this past copper and precious metals producer. We believe shareholders should be very pleased with our aggressive program that has seen the completion of an interim resource and positive preliminary assessment and now the commencement of a Feasibility Study, just 11 months after acquisition of the property. It is a tribute to our team of professional and consultants that we have been able to move this project ahead at such a rapid pace, and we are very pleased to have Hatch officially on board with the task of completing the Feasibility Study in the first half of 2008.”

At present the Company has 4 drills on site, making it one of the largest exploration programs in BC for the 2007 year. The exploration program is being supervised by Peter Holbek, M.Sc., P.Geo., a qualified person as defined by National Policy Instrument 43-101.

**About Copper Mountain Mining Corporation:**

CMMC is a new public BC resource company. The Company owns 100% of the Copper Mountain Project located 15 km south of the town of Princeton in southern British Columbia. The Company recently filed an Independent 43-101 Technical Report pertaining to the interim resource estimate and has completed a video presentation on the Copper Mountain Project, all of which may be found on the company’s website. Copper Mountain Mining Corporation’s shares trade on the TSX Venture Exchange under the symbol CUM and additional information is available on the Company’s web site at [www.CuMtn.com](http://www.CuMtn.com).
